Project Overview

📌 **Project Name:** SpendWise
📌 **Project Description:** SpendWise is a simple Node.js, Express, and MongoDB backend project that allows users to register and login using JWT authentication and perform basic CRUD (Create, Read, Update, Delete) operations on their own data. The project is designed for beginners to learn REST APIs, authentication, and database integration.
📌 **Project Version:** v1.0
📌 **Testing Period:** 13 February 2026 – 16 February 2026

Testing Scope

Features and Functionalities to be Tested

- ☑ User Registration API
- ☑ User Login API (JWT Token Generation)
- ☑ JWT Protected Routes
- ☑ Create Data (CRUD)
- ☑ Read Data (CRUD)
- ☑ Update Data (CRUD)
- ☑ Delete Data (CRUD)
- ☑ MongoDB Database Integration
- ☑ Error Handling for Unauthorized Access

User Stories or Requirements to be Tested

- 📌 User can register with name, email, and password
- 📌 User can login and receive a JWT token
- 📌 User can access protected APIs using JWT token
- 📌 User can create their own records
- 📌 User can view only their own records
- 📌 User can update their own records
- 📌 User can delete their own records

📌 User cannot access data without authentication

Test Cases

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Register User	1. Send POST request to /api/auth/register with valid data	User should be registered successfully	User created	Pass
TC-002	Login User	1. Send POST request to /api/auth/login with valid credentials	JWT token should be returned	Token received	Pass
TC-003	Access Protected API	1. Send request with JWT token	API should allow access	Access granted	Pass
TC-004	Create Record	1. Send POST request with token and data	Record should be created in DB	Record created	Pass
TC-005	Read Records	1. Send GET request with token	User's records should be returned	Record received	Pass
TC-006	Update Record	1. Send PUT request with token and updated data	Record should be updated	Record updated	Pass
TC-007	Delete Record	1. Send DELETE request with token	Record should be deleted	Record deleted	Pass
TC-008	Unauthorized Access	1. Send request without token	Access should be denied	Access denied	Pass

---

Bug Tracking

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
BG-001	None	N/A	Low	Closed	All main features working as expected

Notes

- Testing covers both positive and negative cases.
- JWT authentication and CRUD operations are verified.
- All core features are working correctly.
- Project is ready for student submission and demonstration.
